2035/CM DUAL KEYBOARD CONTROLLER

The 2035/CM Dual Keyboard Controller allows two keyboards to be used to control system devices via the RS-422 output. The two keyboards cannot be used simultaneously. The control is granted to the keyboard that has been activated by use of the keyboard function keys. The other keyboard can only be used 5 seconds after the last activation of the other keyboard.

The 2035/CM Dual Keyboard Controller consists of two RS-422 inputs for the Keyboards and one RS-422 output for the device being controlled. It operates via 12 VDC, which is connected via a power jack in the unit.

Dimensions: 130Wx70Dx50H mm
Power: 12 VDC (50mA max.)
