

CMH Series

Corner and Wall mount high security enclosures.

The CMH Series of corner mount and CMH02WM wall mount housings have been designed for Correctional centre applications. Featuring rugged construction, tamper resistance and with no centre projections the enclosures limit self harm issues.

CMH01 & CMH02 enclosures are a compact body corner mount enclosure taking up less space than triangular housings that enclose similar sized cameras. The CMH02WM (Wall Mount) model has been included in this range to meet the demand for similar enclosures that mount to walls up against the ceiling.

The CMH01 is sized for compact cameras eg: Watec and Elmo whereas the CMH02 and CMH02WM are designed to suit standard and larger camera and lens combinations such as Panasonic, Sony and Ikegami.

All housings are supplied with adjustable camera mounts. Tamper switches are available for all models as an optional extra.
