

## SMW2

### Wedge housing for small to medium sized camera and lens combinations.

The SMW2 offers a single security screw access and the option of surface run conduit to enter the enclosure directly without the conversion to flexible conduit.

The key features of the SMW2 are the range of camera adjustment in an attractive low profile enclosure.

Applications: Car parks, Under Eaves, Railway Platforms, Tunnels and walkways. A general purpose enclosure for small to medium camera and lens combinations.

Omron tamper switch available as an option.

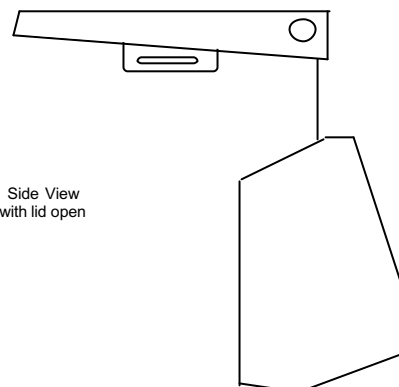

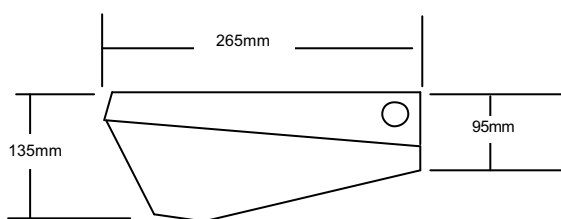

SMW2
